

DANGEROUS ATTITUDES IN AVIATION

Everybody is prone to these attitudes
- some more, some less.

- anti-authority: "Don't tell me what I have to do!"
- impulsivity: "I need to react now!"
- invulnerability: "This can't happen to me!"
- machismo: "Come on, I'll show you how it's done!"
- resignation: "There's nothing more I can do!"

HOW AM I SUPPOSED TO HANDLE THIS?

self-reflection of your behaviour - try to identify situations in which you find the above behaviour again - try to think about a different (better) solution
learn from previous experience - get better every day

while flying always keep in mind:

- follow the rules 1
- think twice 2
- it can also happen to you 3
- you don't have to prove anything to anyone 4
- there is always a solution 5

Try this approach on a regular basis. Change needs time. After finishing the training you will be the one in command - and also the one held responsible for all your decisions.

For more information regarding hazardous / dangerous attitudes in aviation please check the full article published on <https://aviatortraining.net>. You will also find a link for self-assessment there.
